Corrosion Composites Advantage

Why our fiberglass products are superior

Durability:

Monoxivent's Corrosion Composites FRP fiberglass products provide excellent resistance to corrosion and offer a longer service life as compared to similar metal products. Our glass reinforced plastic products are specially designed with consideration for the following: chemical environment, wind, seismic, snow, pressure, vacuum and extreme temperatures.

Standards:

Monoxivent's Corrosion Composites adhere to ASTM, SMACNA, AWWA and other industry standards.

Experienced Team:

Monoxivent's team includes engineering, design, layout, and the very best customer assistance. This coupled with a manufacturing source with over 40 years of experience, a 70,000-sq. foot facility and state of the art equipment makes Corrosion Composites an excellent source for FRP products.

Versatility:

Monoxivent offers a wide-range of fiberglass reinforced plastic products including: Duct, Tanks, Scrubbers, Flumes, Fume Hoods, Dampers, Manholes, Troughs, Tank Covers, Stacks, Stack Lines, Baffles, Weirs, Trenches, Ladders, Platforms, Pressure Vessels, and more.
